

HELIX

Helix, our AI system, is a generalist humanoid Vision-Language-Action model that learns and improves over time as it acquires new skills.

Full Video ↗

HELIX IS DESIGNED TO REASON LIKE A HUMAN

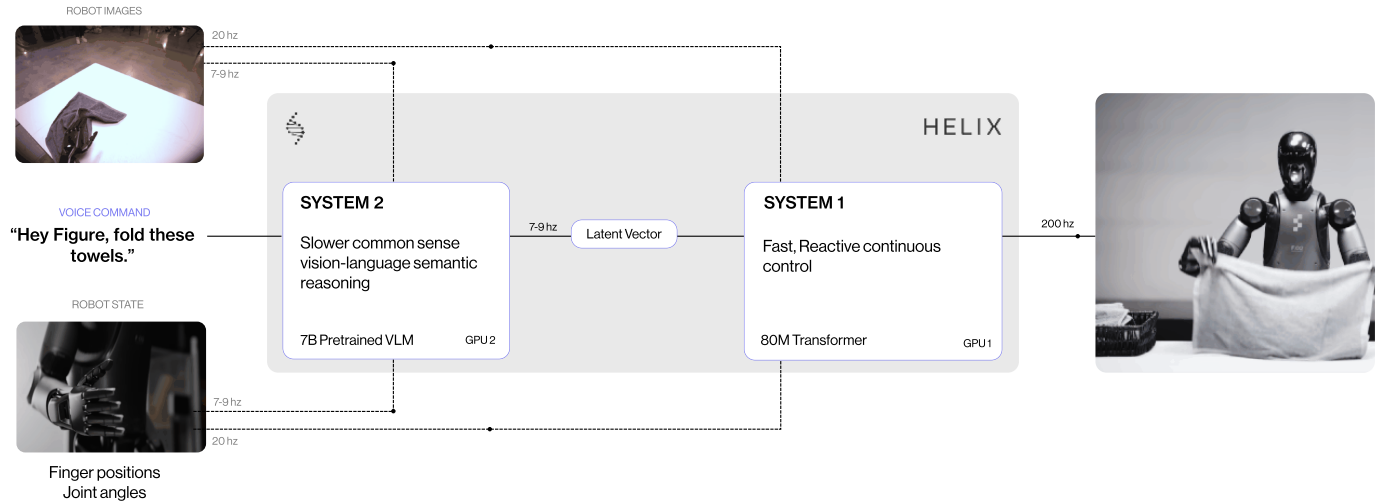

Helix controls the full loop: perception, movement, and reasoning, on board and in real time. This enables Figure 03 to consider and perform tasks on its own, without following a script.

READ OUR LATEST TECHNICAL WRITEUPS ON HELIX'S AI SYSTEM AND ITS REAL-WORLD APPLICATIONS.
